EXPERIENCE

- ❖ **Senior Software Engineer | BJIT Ltd, Dhaka** (Jul'24 - present)
 - **Architected and developed a high-traffic real estate portal** for DMCI Homes (Philippines), building scalable backend systems using Node.js, Express.js, Redis, BullMQ, and AWS.
 - **Engineered optimized, asynchronous API integrations** with external third-party services to ensure seamless data flow and high availability for enterprise clients.
 - **Built robust, client-facing frontends and an extensive Admin Panel** using React.js, specifically delivering the Client Registration Form ([CRF](#)) and Reservation Agreement ([RA](#)) platforms.
 - **Developed an AI-powered telemedicine platform ([AMED](#))** integrating Zoom APIs to assist medical professionals in predicting mental health scores (HAMD, YMRS) using React.js, Node.js, and serverless AWS architecture (Lambda, Cognito, CloudWatch), integrating Zoom APIs to assist doctors in predicting clinical mental health scores (HAMD, YMRS).
 - **Designed scalable relational database schemas** and data models using PostgreSQL, MySQL, and Prisma ORM, significantly improving query performance and data integrity.
 - **Spearheaded the development of a gaming item trading marketplace**, owning the end-to-end delivery from RESTful API architecture to responsive frontend integration.
- ❖ **Software Engineer | BJIT Ltd, Dhaka** (Apr'21 - Jun'24)
 - **Developed and optimized dynamic UI architectures** using React.js and Next.js, resolving complex interface bottlenecks and ensuring cross-browser compatibility.
 - **Built enterprise blockchain solutions** utilizing Hyperledger Fabric and Ethereum, including the engineering of a custom Mozilla Firefox extension integrated with Fabric v1.4 and v2.4.
 - **Streamlined team collaboration and testing** by meticulously documenting RESTful APIs using Postman and ensuring strict version control through Git.
 - **Secured 3rd place overall** in BJIT's highly competitive Common & Blockchain (Ethereum) Engineering Training program. [See](#)
