EXPERIENCE

BJIT Ltd - Dhaka, Bangladesh

Senior Software Engineer

Jul 2024 - Present

- Architected and developed a high-traffic real estate portal for DMCI Homes (Philippines), contributing across frontend and building scalable backend systems using React.js, Node.js, Express.js, Redis, BullMQ, and AWS.
- Engineered optimized, asynchronous API integrations with external third-party services cutting average response time by 20% and reducing sync failures for enterprise clients.
- Built robust, client-facing frontends and an extensive Admin Panel using React.js, specifically delivering the Client Registration Form (CRF) and Reservation Agreement (RA) platforms.
- Developed an AI-powered telemedicine platform (AMED) integrating Zoom APIs to assist medical professionals in predicting clinical mental health scores (HAMD, YMRS) using React.js, Node.js, and serverless AWS architecture (Lambda, Cognito, CloudWatch, S3).
- Designed scalable relational database schemas and data models using PostgreSQL, MySQL, and Prisma ORM, significantly improving query performance and data integrity.
- Spearheaded the development of a gaming item trading marketplace, owning the end-to-end delivery from RESTful API architecture to responsive frontend integration.

Software Engineer

Apr 2021 - Jun 2024

- Developed and optimized dynamic UI architectures using React.js and Next.js, resolving complex interface bottlenecks and ensuring cross-browser compatibility.
- Built enterprise blockchain solutions utilizing Hyperledger Fabric and Ethereum, including the engineering of a custom Mozilla Firefox extension integrated with Fabric v1.4 and v2.4.
- Streamlined team collaboration and testing by meticulously documenting RESTful APIs using Postman and ensuring strict version control through Git.
- Secured 3rd place overall in BJIT's highly competitive Common & Blockchain (Ethereum) Engineering Training program. [Certificate](#)
